

“Chat and Chew” on Careers

HORTICULTURIST

Horticulture is the science and art of growing flowers, fruit trees, vegetables, grasses and ornamental trees. Horticulturists help enhance our everyday lives by providing us with healthy and delicious foods. They can also create and maintain beautiful and practical landscapes. Horticulture is a broad field with a variety of different jobs. Some jobs are in landscaping, field inspection, greenhouse management, and plant maintenance.

Horticulturists must be able to identify different trees and plants, as well as, have a good eye for designing gardens. The minimum education required to work in this field is a two year degree. While a four-year degree may lead to management positions.
