

Blackboard 9.1 Course Reports (previously Course Statistics)

Looking for Course Statistics in Blackboard 9.1?

Blackboard Course Reports (Course Statistics in previous versions of Blackboard) are located within a course's Control Panel. Blackboard technical support recommends using the Access/Date area in the Overall Summary Report for identifying the last day of attendance for Census Dates (10% rosters), course withdrawal dates, etc.

Do not use the Performance Dashboard or the Grade Center's last access date to accomplish this. These areas do not pull information from the same records, so discrepancies between data collected in these areas and Course Reports are common.

NOTICE: Students may assume they have entered a course, yet have only accessed the Announcement, Calendar, or Tasks areas under the FTCC tab after logging into Blackboard. This does not show in Course Reports. Reminders have been posted for students under Distance Learning on FTCC's website.
