FTCC Students Receive Internship Offers from Disney College Program

FAYETTEVILLE, N.C. – March 29, 2010 – Twenty-four students from Fayetteville Technical Community College have been extended internship offers with Disney (Orlando) through the Disney College Program for the 2010 Fall (August 2010 through early January 2011) Fall Advantage (mid May 2010 through early January), and Fall Advantage Quarter (mid June 2010 through early January) Seasons. With 340 schools participating in the Disney College Program, FTCC ranks second in terms of student internship opportunities currently being offered. Students participating in the Disney internships will work in a wide range of areas including attractions, food and beverages, merchandising, hospitality, and housekeeping/custodial. The students' fields of study at FTCC include a variety of curricula from all program areas—business, health, engineering, and general education. Through the Disney internship, students are able to take classroom and personal experiences and further enhance their transferable skills with Disney's focus on customer service, effective communication, teamwork, leadership, time management, personal empowerment, self-confidence, and cultural sensitivity.

"We are thrilled that our students are interested in further enhancing their jobs skills through the Disney College Internship program. Disney's focus on attention to details and serving others with utmost professionalism and high-quality standards provides students a unique advantage when seeking employment," said FTCC President Dr. Larry Keen. "Imagine how exciting these experiences will be for our students, with Disney being their learning lab."

Fayetteville Technical Community College students Barbara Matheu and Pam Evans currently serve as FTCC's Disney campus representatives who promote the Disney College Program to students. More information about the Disney College Program is available at www.wdwcollegeprogram.com.

Fayetteville Technical Community College was established in 1961 and serves over 34,000 students annually by providing 150 affordable occupational, technical, general education, college transfer, and continuing education programs to meet students' needs and desires as well as the community.
