Fayetteville Tech's Tenette Prevatte Selected by Computing Technology Industry Association As Subject-Matter-Expert for Technical Advisory Committee

FAYETTEVILLE, NC – November 2, 2011 – Fayetteville Technical Community College's Tenette Prevatte (Information Systems Security department chair) has been selected through competitive application to serve on the Technical Advisory Committee for the Computing Technology Industry Association. The Comp TIA Subject-Matter-Expert Technical Advisory Committee (CSTAC) is a select group of individuals who display strong expertise in specific technology areas. The purpose of the committee is to better facilitate the recruitment of qualified I.T. professionals worldwide and provide CompTIA with the support and expertise needed during the development of both high-stakes and low-stakes exam development phases.

"Since our primary mission here at FTCC is to build a globally competitive workforce supporting economic development, being actively involved with our industry partners is critical in keeping current on what skills our students need for today's workplace. Tenette's involvement with CompTIA in the area of I.T. industry certifications does just that," said FTCC Dean of Business Programs William Griffin.

"Our faculty members play a significant role in the positive experiences our students receive, and when our faculty members seek out opportunities to enhance their professionalism, their initiative directly impacts the quality of instruction that our students receive at Fayetteville Tech," said FTCC President Dr. Larry Keen. "We are pleased that Tenette is being recognized as a subject-matter-expert in the field of computing technology and that she will be sharing her gains from this experience with our students."

Tenette Prevatte began working at Fayetteville Tech in March 2005 as a Computer Information Systems Technology instructor. She was promoted to department chairperson of Information Systems Security on August 1, 2005. She received a master of business and science (MBS) degree from Campbell University.

Founded in 1961, Fayetteville Technical Community College is one of 58 institutions in the North Carolina Community College System. FTCC serves more than 38,000 students annually by providing over 150 occupational, technical, general education, college transfer, and continuing education programs.
